

The diagram shows a vertical channel defined by two black lines. The left line is mostly straight but has a small inward curve near the bottom. The right line is mostly straight but has a small outward curve near the bottom. Three points are marked along the channel: a green dot at the top, a blue dot in the middle, and a red dot at the bottom. To the right of each dot is a corresponding text label: '-end' in green, '-center' in blue, and '-taperM-center' in red.

-end

-center

-taperM-center
